

Middle Georgia Technical College has implemented Microsoft Outlook Web Access as the student email provider. Student email accounts are generated several times before each quarter starts and several times a day for the first few days of the quarter, so the first day you register your account may not be active.

The first step is to access the email system by entering <http://mail.student.middlegatech.edu> into the address bar of your browser. The default mail sign-in page should load; it will be similar to what is shown below.

Enter your username and password then click the "Log On" button. (Your username is your email address without @student.middlegatech, for example if your email address is test@middlegatech.edu your username will be test.)

Once you have successfully logged in you will have access to the full email interface.
